

# International Literacy Day

## September 8

### LITERACY IS A FUNDAMENTAL HUMAN RIGHT

I was so frustrated. It was like running down a dead-end street. My mind was in a prison. I was lonely. I had a painful secret. I needed help...

What a difference in knowing basic reading and writing skills. It has changed my life. I have self-confidence.

I am achieving my goals. Life without the power to read and write is a hard one.
